GLASS CLEANER

Advanced "green" glass cleaning formula that leaves no streaks or sticky residue.

- Streak-free with no soil attracting residue
- Works best in tandem with microfiber cloths

Glass Cleaner from Groom Solutions uses safer ingredients to create the world's best glass cleaner. The water used is cleaned, filtered and purified to remove all minerals that could cause streaking. This Glass Cleaner can be used in fire restoration situations for removing soot, fingerprints, etc. on glass and other non-porous fine hard surfaces.

DIRECTIONS

1. The Glass Cleaner is ready to use for professional cleaners. It can be diluted with up to one part distilled water. If distilled water is not available then do not dilute. Dilution with soft or hard water significantly impacts the cleaning performance, which is not justified by saving a few pennies.
2. Spray a fine mist directly on the glass or other non-porous hard surfaces starting at the top. Wipe off and buff using a specialized microfiber glass cleaning cloth. Depending on the soil level one cloth may need to be reserved for the wiping and another cloth for the buffing. Repeat as necessary.
3. Do not use fabric softener when laundering microfiber cloths as it removes the charge, which attracts soils into the cloth.

INGREDIENT DISCLOSURE

Water, Methoxyisopropanol, Isopropanol, Sodium Caprylyl Sulfonate, Dimethyl 9-Decenamamide, Tetrasodium EDTA, Lauramine Oxide, 2-Methoxypropanol.

DIRECCIONES

1. El limpiador de vidrio está listo para usarse en la limpieza profesional. Se puede diluir con una parte de agua destilada. Si no tiene disponible agua destilada, no lo diluya. La dilución con

agua regular tiene un impacto significativo en el rendimiento de limpieza, que no se justifica por el ahorro de unos pocos centavos.

2. Rocíe una capa fina directamente sobre el cristal u otras superficies no porosas empezando desde la parte superior. Limpie y de brillo con un paño de microfibra especial para vidrios. Dependiendo del nivel de suciedad, un paño puede reservarse para la limpieza y otro para el brillo. Repita si es necesario.
3. No utilice suavizantes de ropa al lavar los paños de microfibra, porque elimina la estática, y esta atrae la suciedad hacia la tela.

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.
