

Professional Leather Protector

X Leather Furniture X Leather Apparel ✓ Leather Car Interior

X = Primary Use ✓ = Secondary Use

Contents: One U.S. Quart (.94 Litres)

- Provides protection
- Easy to apply and easy to use
- Keeps leather looking new

DIRECTIONS:

General Usage Considerations

1. As with all solutions, test for colorfastness on the leather you are going to protect in an inconspicuous area prior to using.
2. It is highly recommended that the leather has been professionally cleaned with Hydro-Force Professional Leather Cleaner prior to the application and treated with Hydro-Force Professional Leather Revitalizer after to the application of this protector.
3. Use a dedicated microfiber or soft lint free towel that you only use on leather for agitation and removal of excess solution.
4. This product is not recommended for use on suede, brushed, nubuck, or "naked" leather. It may slightly darken some light colored leather.
5. For best results, Leather furniture subject to normal soiling conditions should have protector re-applied every 3-6 months.

Application

1. Shake well before using.
2. Make certain that the leather is clean before applying. Apply Hydro-Force Professional Leather Protector to a slightly dampened dedicated microfiber cloth or soft colorfast towel and wipe the product evenly over the surface of the leather.
3. It is recommended to apply two coats to heavy use areas like the arms and seats of the leather. Speed drying leaves more of the protector on the surface of the leather where it is most needed.

4. Wait until the leather is dry before adding Leather Revitalizer. Keep the unit out of service until the leather is dry to the touch.

CONTAINS:

Deionized Water (CAS# 7732-18-5), Proprietary blend of fluorochemical, thickeners, and non-ionic surfactant.
