X = Primary Use ✓ = Secondary Use

A Two Part Reducing Stain Remover for all types of food and beverage based stains, including children's fruit drinks.

*For professional use only.*

*Keep out of reach of children!*

*Before using, read all cautions and directions!*

**REDZONE** Red Stain Remover is a two part, highly effective, food and beverage stain removal process that is designed to alter the structure of stains by removing or making them invisible. It is ideal for use with any stain caused by spilled children's fruit drinks or sports drinks. This product is safe and effective on virtually any stain caused by a common household food or beverage spill. Because RedZONE is applied in a two step process, there is no waste of product due to disposal of unused mixed solution. In addition, special additives allow the accelerating action to be acti-

**Contents: One U.S. Quart (.94 Litres)**

vated right on the stain rather than in a spray bottle as with conventional two part Red Stain Removers. It also eliminates problems with one part stain removers that break down or separate over time in the back of your work vehicle. This product is for use with synthetic carpet or fabrics only. Not recommended for natural fabrics. **FOR PROFESSIONAL USE ONLY**

### SOLUTION A - REDUCER DIRECTIONS:

1. Applying RedZONE is a two step process. Always pretest process for colorfastness in an inconspicuous area.
2. Clean stained area normally prior to application of this product. Take extra vacuum pass to remove as much moisture as possible.
3. Apply Solution A liberally (saturate spray) to the stained area. Allow 20-30 seconds of dwell time.
4. Apply Solution B liberally (saturate spray) to the stained area.
5. Allow 20 -30 seconds of dwell time and evaluate results. Many stains are removed simply by extracting the area thoroughly with clear water at

CS33QT

this point. If residual discoloration remains, do not extract solutions.

Proceed to accelerate activity with heat.

6. Apply heat as accelerator. If using a low pressure, high volume steam generator such as a wallpaper remover, simply allow steam wand to sit on treated area for two to three minutes. Check area periodically. If using a steam iron, cover stained area with a wet, white, cotton towel. Apply steam heat from an iron set at the lowest steam temperature. Lift and move the iron every 20-30 seconds and check area.
7. When the stain has completely disappeared, completely extract the area with water. If a light yellow discoloration remains, simply let the area dry without extraction and this discoloration usually goes away.

### CONTENTS: SOLUTION A

Water (C.A.S. #7732-18-5), Sodium Bisulfite (C.A.S. #7631-90-5), Proprietary Stabilizer

### PRECAUTIONS AND FIRST AID:
