URINE PRETREATMENT

Urine Neutralizing Treatment

- Used for pre-treatment of urine deposits to break down, dissolve, & neutralize alkaline salt deposits
- Enhances the performance and speeds up the process of ALL deodorizers that contain bacteria – including Malodor Modifier
- Contains odor suppressants that make the work area less offensive until deodorizing treatment starts

DIRECTIONS

Universal Precautions

1. Always pretest for colorfastness and appearance change in an inconspicuous area of the surface you are going to clean prior to application.

Procedure for Neutralizing & Removing Urine Contamination

1. Mix 1 part Urine Pretreatment with two parts water. Pretest in an inconspicuous area for compatibility and colorfastness.
2. Use a sprayer or pour directly to saturate the contaminated area.
3. Allow 5 to 10 minutes dwell time, then extract the area thoroughly. Additional water and a Water Claw or Flash Xtractor can be used to thoroughly flush contaminated area.
4. Proceed with regular cleaning.

For Urine Pre-Treatment

1. For large area urine contamination pre-treatment and neutralizing, dilute 1 part solution with 4 parts water in pump up or trigger sprayer..
2. Saturate contaminated areas by spraying or pouring on mixed solutions. For best results, allow to dwell 5 - 15

- minutes. Gently agitate or work in with soft brush or white towel.
3. Rinse and extract with clear water. For best results, extract with Water Claw or Spot Lifter. Then apply Aromacide, Malodor Modifier.

CONTENTS

Water, Acetic Acid (CAS# 64-19-7) proprietary surfactant blend, proprietary rinse agent, Citric Acid (CAS# 77-92-9).
