

# REVIVE STONE COLOR ENHANCER & SEALER

Revives the brilliant colors nature put in your stone.

## REVIVE

Reveals the vibrant colors hidden in the stone and highlights all the rich colors of the stone.

RTU ph - 4.0

Contents: One U.S. Gallon (3.79 Litres)

- Revives and brings out the natural color and beauty of stone and seals it against spills and soiling
- Can disguise minor etching and scratching
- Keep from freezing, not freeze-thaw stable
- Rejuvenate and revitalize stone
- Ideal for porous, unpolished stone, slate, and saltillo tile

### DIRECTIONS FOR USE:

Read entire label before using. Use only as directed. Test in a small inconspicuous area with a 24-hour cure time to determine ease of application and desired results. Allow new grout installations to cure for at least 72 hours prior to application. Be sure surface is clean, thoroughly dry and free of sealers, waxes and coatings. Not recommended for exterior surfaces.

1. Shake vigorously before each use.
2. Apply a thin layer of product using a paint pad, roller or brush. For larger areas product can be sprayed or poured on the floor. It then needs to be spread or worked in with a clean synthetic brush. Avoid puddling in low spots. Avoid applying product on unintended surfaces. Do not aerosolize this product.
3. Allow product to penetrate the surface for 15-30 minutes; denser material may require maximum time for Revive to penetrate. Keep surface wet with sealer, adding more product if needed to prevent dry spots, for the entire penetration time. Following penetration time, completely wipe surface clean and dry with absorbent towels. For larger areas, buff the surface using a rotary floor machine and white pad. **DO NOT ALLOW EXCESS REVIVE TO DRY COMPLETELY ON SURFACE.**
4. A second coat may be needed for porous, absorbent surfaces or if a darker appearance is required. Apply second coat 1 hour after first coat following directions in steps 1-2. Clean tools used during application with water.
5. A full cure is achieved after 24-72 hours; foot traffic may begin in 6-8 hours.
6. For use to disguise minor etching or scratching on polished stone surfaces, apply solution to cloth and rub into etch mark. A second coat may be necessary. After second application, if etch is still visible, polishing will need to be performed to

eliminate etch.  
Coverage: A gallon will cover from 400 to 1000 square feet depending upon the porosity of the surface.

### CONTAINS

Water (CAS # 7732-18-5), Proprietary polymers, Glycol Ether EB (CAS #111-76-2), Glycol Ether DPM (CAS # 34590-94-8).

### INSTRUCCIONES DE USO

Lea toda la etiqueta antes de usarse. Use solo como se indica. Pruebe en un area poco visible. Para determinar los resultados deseados hay que hacer la prueba 24 horas antes. Deje la nueva cura del grout por lo menos 72 horas antes de la aplicacion. Asegurese que la superficie este limpia, seca que no tenga sellador. No es recomendable par alas superficies de a fuera

1. Agitese el embase antes de usarse
2. Usando una brocha, o rodillo para pintar aplique una capa ligera de este producto. Para areas grandes este producto puede ser rociado, o puede vaciarlo directamente al piso. Y si necesita esparcir el producto use in cepillo sintetico limpio. Evitar encharcamientos en lugares bajos. Apliquelo usando un jalador para extender el producto
3. Deje penetrar el producto en la superficie durante 15-30 minutos, si el material esta denso talvez requiera de mas tiempo para que el producto penetre. Mantenga la superficie mojada del sellador, anada mas producto si es necesario para prevenir partes sin cubrir, para mejores resultados, siga los procedimientos de penetracion, seque el area completamente con una toalla limpia y absorbente. Para areas grandes, pula el area usando la maquina rotatoria para pisos. **NO PERMITA QUE SE SEQUE EL EXCESO DE REVIVE EN LA SUPERFICIE.**
4. Segunda capa talvez necesite para cubrir mejor, si absorbe en algunos lugares o aparecen manchas obscuras. Aplique una segunda capa 1 hora despues de la primera siguiendo los pasos 1-2. Limpie las herramientas con agua.
5. Estara listo y seco entre 24-72 horas, pero podrian usarse entre 6-8 horas.
6. Para el uso en cuarteaduras, rasgunos en superficies de piedra, aplique solucion a un trapo y talle en el lugar deseado,

talvez necesite repetir 2 veces el procedimiento

Coertura: Un galon cubre de 400 a 1000 sq ft dependiendo de la porosidad de la superficie.
