

HydraStone™

Heavy Duty Stone and Tile Cleaning Solution

HydraStone Heavy Duty Stone, Tile and Grout Cleaning solution is specially formulated for the heavy duty cleaning of natural stone floors and surfaces, as well as tile and grout floors and walls. Unlike most hard surface cleaners that contain water conditioning agents and harsh solvents that can actually etch and damage a fine stone surface, HydraStone was specifically made to safely and effectively clean stone and tile surfaces.

If for any reason you are not thrilled with the performance of HydraStone, return it to your distributor and we'll get you a product that does.

Net Contents:
One U.S. Gallon (3.78 liters)

HARD SURFACE

RTU pH 10.5 - 11.0

1:8 - 32

Marble, granite, limestone, travertine, slate & sandstone, as well as ceramic, porcelain and quarry tile & grout

Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in conjunction therewith. The user should thoroughly review the material safety data sheet for this product and follow recommendations for mixing, application, disposal, and the use of any applicable personal protective equipment (PPE). The manufacturer, distributor, and seller of this product warrant that the chemical contained herein conforms to its standard specifications.

Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. The manufacturer and seller make no representation or warranty, including merchantability or any other kind, expressed or implied. The foregoing may not be altered except by written agreement by officers of the manufacturer.

HydraStone Heavy Duty Stone, Tile and Grout Cleaning solution is specially formulated for the heavy duty cleaning of natural stone floors and surfaces, as well as tile and grout floors and walls. Unlike most hard surface cleaners that contain water conditioning agents and harsh solvents that can actually etch and damage a fine stone surface, HydraStone was specifically made to safely and effectively clean stone and tile surfaces. HydraStone is designed to deep clean and restoratively clean marble, granite, limestone, travertine, slate & sandstone as well as ceramic, porcelain and quarry tile & grout. It also works to effectively dissolve and emulsify stubborn soils on masonry and concrete. HydraStone is designed to be applied as a pre-spray/pretreatment spray to loosen, dissolve, break down and emulsify built-up soiling, and to assist in stain removal. It is the ideal stone and tile cleaner for stone and tile surfaces that have been affected by smoke and soot damage following a fire or furnace puff-back. HydraStone can be used in conjunction with a rotary hard surface cleaning tool such as a RX20 with hard surface attachments, a stationary hard surface wand, an autoscrubber, or even a mop and rinse system. It leaves the surface squeaky clean and residue free when used as directed.

Directions:

1. Sweep or vacuum floors prior to deep cleaning to remove particulate soils. An untreated microfiber dust mop works well for this. **It is absolutely necessary to remove all particulate soiling from a stone surface prior to cleaning if you are going to use a high pressure rotary extraction tool to clean stone. Otherwise, the particulate soiling can become entrapped by the rotary head and severely scratch some stone surfaces, particularly polished marble.**
2. For normal soiling, Mix 1 part HydraStone with 16 parts water into sprayer (8 ounces of solution /gallon of water). For heavy soiling, mix 1 part HydraStone with 8 parts water 16 ounces of solution/gallon of water). For maintenance cleaning of countertops and other surfaces, mix 1 part HydraStone with 32 parts water (4 ounces of solution/gallon of water)
3. Apply with sprayer or mop
4. Allow several minutes of dwell time but do not allow solution to dry.
5. Grout lines may need to be agitated with a grout brush.
6. For best results, agitate and extract cleaning solution using high pressure warm or hot water from a RX20 with a hard surface attachment, hard surface rotary extraction tool or high pressure hard surface wand. Your portable or Truckmounted extractor should maintain a minimum of 800 psi and a maximum of 1200 psi. For more sensitive surfaces, consider using a hard surface wand or simply mop with clean water and rinse. Specialty hand-held hard surface pressure cleaning tools will be very helpful when cleaning countertops, walls, along edges, and in tight places.

7. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.
8. After the floor has dried, consider the need for application of HydraSeal to protect the surface. HydraSeal should only be used marble, granite, limestone, bluestone, Saltillo, travertine, and terrazzo. Stone that is prone to efflorescence such as slate should only be sealed with a solvent impregnating sealer.

Contents: Glycol ether PNB (5131-66-8), proprietary surfactant, glycol ether DB (112-34-5), sodium metasilicate (6834-92-0)

Precautions and First Aid:

Keep out of reach of children. Contact may cause skin and eye irritation. Wear gloves and safety glasses when handling to avoid any contact with eyes and contact with skin in concentrate form. Use only in well ventilated areas. In case of eye contact, immediately flush with plenty of water. If irritation persists, seek medical attention. In case of skin irritation, flush with plenty of water. If ingested, drink large quantities of water and seek medical attention. Remove to fresh air in case of inhalation. See Material Safety Data Sheet (MSDS): www.hydraster.com/msds for additional safety and regulatory information.

Precauciones y Primeros Auxilios:

Mantener fuera del alcance de los niños. El contacto puede causar irritación cutánea y ocular. Use guantes y gafas de seguridad cuando manipule para evitar cualquier contacto con los ojos y el contacto con la piel en forma de concentrado. Usar sólo en áreas bien ventiladas. En caso de contacto con los ojos, lávelos inmediatamente con abundante agua. Si la irritación persiste, busque atención médica. En caso de irritación de la piel, lavar con abundante agua. Si se ingiere, beba grandes cantidades de agua y buscar atención médica. Trasladar al aire fresco en caso de inhalación. Ver ficha de seguridad (MSDS): www.hydraster.com/msds para mayor seguridad y normativas
